is handled and the conditions of use.

**Skin Protection:** Wear appropriate protective gloves and clean, body-covering clothing, when workplace conditions

warrant their use.

Respiratory Protection: If ventilation and other engineering controls and work practices are not effective in controlling

exposure to this material, then wear suitable personal protective equipment including approved respiratory protective equipment (RPE). Where occupational exposure limits are exceeded, workers must wear an approved respirator. In workplaces where respiratory protection is required, institute a complete respiratory protection program including selection, fit testing, training, maintenance and inspection. Consult with respirator manufacturer to determine respirator selection, use and limitations.

A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements, European Standard EN529 or Canadian Standards Association (CSA) Standard Z94.4-2002 must be
